Development Team

Stage 1 — Support Ticket Agent View

PCS Backoffice Portal — Business Requirements

Document Version: 1.1
Date: May 4, 2026
Stages: All Stages (1–7)
Status: Draft — Pending Business Sign-Off
Prepared by: Development Team
Review Required From: Business Stakeholders

Purpose

This document describes the functionality of the PCS Wireless Sales Backoffice Portal. **Stage 1** is fully scoped with user stories and use cases for business sign-off. Stages 2 through 7 are summarised by feature area for visibility; each will receive its own full requirements and sign-off process before entering development.

Please review Stage 1 and indicate:

- **Approved** — functionality is correct as described
- **Change Required** — something needs to be different (add comment)
- **Out of Scope** — functionality should be removed or deferred

Delivery Stages

Stage	Scope	Status
Stage 1	Support Ticket Agent View	This document
Stage 2	RMA Management Queue	Upcoming
Stage 3	Authentication, Dashboard, Customer Search & List, Customer 360 View	Upcoming
Stage 4	Inventory Browser with Floor Pricing & Quote Creation Tool	Upcoming
Stage 5	Customer Analytics & AI Insights	Upcoming
Stage 6	Quote Approvals	Upcoming
Stage 7	Calendar & Meeting Scheduling (Office 365 Integration)	Upcoming

Note on Authentication: Basic authentication is a prerequisite for all stages. The full Azure Active Directory (Azure AD) SSO implementation is formally scoped in Stage 3. Stages 1 and 2 may use a simplified login mechanism during development and will be upgraded to Azure AD SSO when Stage 3 is delivered.

Table of Contents

 3. [Out of Scope / Upcoming Stages](#)
-

1. Stage 1 — Support Ticket Agent View

A two-panel support interface allowing sales reps and support agents to view, manage, and respond to customer support tickets. This is the first stage delivered because it provides immediate value for customer service operations with minimal dependencies.

User Stories

US-B-01 — As a support agent, I want to see a list of all customer support tickets so that I can triage and respond to open requests.

US-B-02 — As a support agent, I want to filter tickets by status (Open, In Progress, Waiting, Resolved) so that I can focus on tickets that need attention.

US-B-03 — As a support agent, I want to filter tickets by priority (Urgent, High, Normal, Low) so that I can handle the most critical issues first.

US-B-04 — As a support agent, I want to filter tickets by category (Order Issue, Shipping, RMA, Billing, Quote, Certificate, General) so that I can work through a specific type of request.

US-B-05 — As a support agent, I want to filter tickets by assigned sales rep so that I can view only the tickets relevant to my accounts.

US-B-06 — As a support agent, I want to select a ticket from the list and see the full conversation thread in a detail panel so that I can understand the complete history before responding.

US-B-07 — As a support agent, I want to read customer messages and previous agent replies in a clear threaded view so that I can follow the dialogue without confusion.

US-B-08 — As a support agent, I want to type and send a reply to a customer ticket so that I can respond to their request directly from the portal.

US-B-09 — As a support agent, I want to add an internal note to a ticket that is only visible to staff so that I can communicate context to colleagues without the customer seeing it.

US-B-10 — As a support agent, I want to change the status of a ticket (Open → In Progress → Waiting → Resolved) so that the ticket lifecycle is accurately tracked.

US-B-11 — As a support agent, I want to change the priority of a ticket so that escalations are reflected immediately.

US-B-12 — As a support agent, I want to reassign a ticket to another agent or sales rep so that the right person handles the issue.

US-B-13 — As a support agent, I want to see a visual priority indicator (colour-coded dot) on each ticket in the list so that I can spot urgent tickets at a glance without reading every row.

US-B-14 — As a support agent, I want to see an empty state when no ticket is selected so that the interface is clear and I know to choose a ticket from the list.

Use Cases

ID	Use Case	Actor	Outcome
UC-B-01	View ticket list	Agent	All tickets displayed with ID, subject, customer, category, priority indicator, status, and last updated timestamp
UC-B-02	Filter by status	Agent	Ticket list filtered to the selected status; count updates
UC-B-03	Filter by priority	Agent	Ticket list filtered to the selected priority level
UC-B-04	Filter by category	Agent	Ticket list filtered to the selected category
UC-B-05	Filter by sales rep	Agent	Ticket list filtered to tickets assigned to the selected rep
UC-B-06	Select ticket	Agent	Right panel displays the full ticket detail and conversation thread; selected ticket highlighted in list
UC-B-07	Deselect ticket	Agent	Pressing Escape or clicking elsewhere deselects the ticket; right panel returns to empty state
UC-B-08	Read conversation thread	Agent	Customer messages shown right-aligned (blue); agent messages shown left-aligned (white with Agent badge); internal notes shown left-aligned (amber with Internal Note badge, italic text)
UC-B-09	Reply to ticket	Agent	Agent types reply in textarea, clicks Send; message added to thread with agent name, timestamp, and Agent badge; customer is notified
UC-B-10	Add internal note	Agent	Agent switches to Internal Note mode, types note, clicks Add; note appears in thread with amber background and Internal Note badge; not visible to customer

ID	Use Case	Actor	Outcome
UC-B-11	Change ticket status	Agent	Status dropdown updated; change reflected in ticket list and detail header immediately
UC-B-12	Change ticket priority	Agent	Priority dropdown updated; priority indicator in ticket list updates immediately
UC-B-13	Reassign ticket	Agent	Assignee dropdown updated to selected agent or sales rep
UC-B-14	View empty state	Agent	When no ticket is selected, right panel displays a centred icon and "Select a ticket to view details" message

Ticket Status Definitions

Status	Meaning
Open	Ticket has been submitted and is awaiting first response
In Progress	A staff member is actively working on the issue
Waiting	Response has been sent; awaiting customer reply
Resolved	Issue has been closed

Ticket Priority Definitions

Priority	Indicator	Meaning
Urgent	Red dot	Business-critical issue requiring immediate response
High	Amber dot	Important issue to be addressed same day
Normal	Blue dot	Standard request with no time pressure
Low	Grey dot	Minor or informational request

Ticket Categories

Order Issue, Shipping, RMA Enquiry, Billing, Quote, Certificate, General

Reply vs Internal Note

Mode	Visibility	Background
Reply	Customer and staff	White (agent message)
Internal Note	Staff only	Amber

2. User Roles & Permissions

Role Definitions

Role	Description
Sales Representative	Full access to Stages 1–5 and 7; cannot approve quotes (Stage 6)
Sales Manager	Full access to all stages including quote approval
Support Agent	Access to Stage 1 (Support Tickets) only; cannot access financial, RMA, or inventory data

Access Matrix

Feature	Sales Rep	Sales Manager	Support Agent
View support tickets	✓	✓	✓
Reply to tickets	✓	✓	✓
Add internal notes	✓	✓	✓
Change ticket status / priority / assignee	✓	✓	✓
View RMA queue	✓	✓	—
Approve / Refuse RMAs	✓	✓	—

Approve / counter-offer / reject quotes	—	✓	—
View customer analytics	✓	✓	—
View AI insights dashboard	—	✓	—

Feature	Sales Rep	Sales Manager	Support Agent
Create & manage meetings	✓	✓	—

3. Out of Scope / Upcoming Stages

The following functionality is **not** included in Stage 1. Each stage will require its own full requirements and sign-off process before development begins.

Stage 2 — RMA Management Queue

A centralised queue for sales reps to review, approve, or refuse customer return requests (RMAs). Builds on Stage 1 by adding the first transactional workflow to the backoffice.

Feature	Description
RMA summary dashboard	4 KPI cards: Total RMAs (MTD), Pending Review, Approved (MTD), Refused (MTD)
Status tab filtering	Filter RMA list by All, Pending Review, Approved, Refused, or Complete; tab count badges update dynamically
RMA list view	Table showing RMA #, Customer, Date, Order #, Device Count, Complaint Reason, and Status
RMA review modal	Modal showing RMA reference details and a device table (IMEI, Model, Complaint per device)
Approve RMA	Select resolution type (Credit Memo, Replacement, or Partial Credit), add optional notes, and confirm; status updates to Approved
Refuse RMA	Select refusal reason, add optional notes, and confirm; status updates to Refused
Read-only RMA view	View completed, approved, or refused RMAs in a read-only modal with resolution or refusal details
Export RMA list	Export the current filtered RMA list as a CSV file

RMA Resolution Types

Resolution	Meaning
Credit Memo	A credit is issued to the customer's account
Replacement	Replacement devices are sent to the customer

Resolution	Meaning
Partial Credit	A portion of the original value is credited

RMA Refusal Reasons

Warranty Expired, Out of Policy, Damage Not Covered, Insufficient Documentation, Customer Error, Other

RMA Status Definitions

Status	Meaning
Submitted	Customer has submitted the RMA; awaiting staff review
Pending Review	RMA is in the staff review queue
Approved	RMA has been approved with a resolution assigned
Refused	RMA has been declined with a reason recorded
Complete	Resolution has been fully processed (credit issued or replacement shipped)

Stage 3 — Authentication, Dashboard, Customer Search & Customer 360

Delivers the full internal authentication layer (Azure AD SSO), the main backoffice dashboard with account-wide KPIs, the customer directory, and the comprehensive Customer 360 view.

3.1 Authentication

Feature	Description
Azure AD SSO login	Staff log in with their @pcsw.com Microsoft account via Single Sign-On
Pre-filled identity display	Login page shows the user's verified name and email before sign-in is clicked
Non-PCS account rejection	Authentication fails for non-@pcsw.com accounts; message directs user to IT for access
Session re-authentication	Expired sessions redirect the user to Microsoft login; on success, returned to previous location

3.2 Dashboard

Feature	Description
KPI cards	5 cards: Total Customers, Open RMAs, Open Tickets, Pending Quotes, Revenue MTD — each with a supporting sub-metric

Feature	Description
Quick actions	Buttons for Create Quote, View Pending RMAs, Customer Lookup, and Schedule Meeting
Recent activity feed	Last 8–10 account events displayed chronologically with icon, description, and timestamp
Upcoming meetings panel	Next 3–4 meetings shown with customer name, meeting type, date, and time
Global search	Header search bar surfaces matching customers, quotes, and RMAs; selecting a result navigates to it

3.3 Customer Search & List

Feature	Description
Customer search	Real-time search by company name, email address, or phone number
Filter by sales rep	Filter list to customers assigned to a selected rep
Filter by location	Filter list by city or state
Filter by account status	Filter by Active, On Hold, or Suspended
Filter by device type	Filter by the customer's primary device brand
Reset filters	Clear all active filters with a single button; result count updates
Result count	Displays count of matching records (e.g. "Showing 12 customers")
Open customer account	Click a row to navigate to the Customer 360 view for that customer
Export customer list	Export the current filtered list as a CSV file

3.4 Customer 360 View

Feature	Description
Customer header	Company name, status badge, location, sales rep, primary contact, credit limit, available credit, account age, and payment terms
Tab navigation	Nine tabs: Overview, Invoices, Financial, Shipments, Support Cases, RMA, Quotes, Portal Users, Activity
Overview tab	KPIs (Total Spending, Open RMAs, RMA %, Open Tickets, Open Offers) and a recent orders table
Invoices tab	Invoice history: Invoice #, Date, Amount, Due Date, Status, Balance

Feature	Description
Financial tab	Account balance summary and aging breakdown (Current, 30, 60, 90+ days)
Shipments tab	Active and recent shipments table
Support Cases tab	Open support tickets for the account with status and priority
RMA tab	Full return history table with return rate % indicator
Quotes tab	Open and historical quotes with status and value
Portal Users tab	View, invite, and reset passwords for customer portal sub-users
Activity tab	Chronological account event log and recent customer portal search terms

Stage 4 — Inventory Browser & Quote Creation Tool

Gives sales reps visibility into live inventory across warehouse locations, including tier pricing and floor prices, and the ability to build and submit custom quotes for customers.

4.1 Inventory Browser

Feature	Description
ERP sync status banner	Shows last sync time; data is read-only (managed by ERP)
Inventory KPIs	4 cards: Total SKUs, Total Units, Warehouses, Low Stock Alerts
Filter by warehouse	Filter inventory to a specific warehouse location
Filter by brand / grade / storage	Multi-dimension product filtering
Search inventory	Real-time search by product name, SKU, or lot ID
Low stock indicator	Amber indicator on items with limited availability
Price tier breakdown	Expandable row showing quantity ranges, unit prices, and margin vs. floor price
Floor price display	Minimum allowed price shown per product
Margin colour coding	Margin % shown in green (>20%), amber (10–20%), or red (<10%)

4.2 Quote Creation Tool

Feature	Description
Customer selection	Associate the quote with a specific customer account before building
Product catalog browse	Browse products as cards with name, grade, storage, colour, price tiers, quantity, and floor price
Search / filter catalog	Filter by brand or search by product name in real time
Add product to quote	Add products to the Quote Builder panel; line item shows details, quantity, tier price, and custom price input
Tier price auto-update	Tier price recalculates automatically when quantity is changed
Custom pricing with margin	Enter a custom per-unit price; resulting margin shown with colour coding
Below-floor price warning	Input highlighted red with warning icon if custom price falls below floor price
Add notes	Notes saved with quote and visible to the approving manager
Save as draft	Save quote with Draft status for future editing
Submit for approval	Submit quote for manager review; status changes to Submitted; confirmation toast shown
Quote management view	View all quotes with status filter, columns, and action buttons
Withdraw quote	Cancel a quote that has not yet been approved; status changes to Withdrawn

Quote Statuses

Status	Meaning
Draft	Quote saved but not yet submitted
Submitted	Quote submitted for manager approval
Under Review	Manager is actively reviewing the quote
Approved	Manager has approved the quote; ready to send to customer
Counter-Offered	Manager has proposed adjusted pricing
Accepted	Customer has accepted the quote
Rejected	Quote rejected by manager or declined by customer
Expired	Quote validity period has passed

Status	Meaning
Withdrawn	Sales rep cancelled the quote before approval

Stage 5 — Customer Analytics & AI Insights

Adds an analytics layer to the Customer 360 view and a standalone insights dashboard. Uses AI to surface purchase behaviour patterns, flag at-risk accounts, and highlight aging inventory opportunities.

Feature	Description
Purchase behaviour analytics	Order frequency, average order value, top product categories, preferred grade, and 12-month spend trend chart per customer
AI product recommendations	AI-generated list of recommended products per customer based on purchase history, displayed with reasoning
At-risk customer alerts	Customers with declining order frequency or spend flagged with an alert badge in the customer list and on the customer header
AI account summary	One-paragraph AI-generated overview of the customer with key facts, recent trends, and suggested next actions
Aging inventory insights	Dashboard panel showing slow-moving SKUs with days-in-stock, current quantity, and AI-suggested price adjustment
Best-fit customers for clearance	For each aging SKU, a list of customers most likely to purchase is surfaced with a suggested outreach action
Customer segmentation	Segment badge per account (High Value, Growth, At Risk, Dormant) applied to the customer list
Segment filtering	Filter customer list by segment
Analytics export	Export customer analytics data or portfolio summary as CSV or PDF

Customer Segment Definitions

Segment	Definition
High Value	Consistently high spend and order frequency
Growth	Order frequency or spend increasing quarter-over-quarter
At Risk	Declining order frequency or spend versus prior period
Dormant	No orders placed in the past 90 days

Stage 6 — Quote Approvals

A manager-only approval queue where Sales Managers review quotes submitted by sales reps and approve, counter-offer, or reject them before they reach the customer.

Feature	Description
Approval queue KPIs	4 cards: Pending Approval, Approved MTD, Counter-Offered, Average Margin %
Status tab filtering	Filter queue by Pending, Approved, Counter-Offered, Rejected, or historical
Queue table	Quote #, Customer, Sales Rep, Date, Total (\$), Margin % (colour-coded), Status, and action button
Quote review modal	Rep notes and line items with catalog price, floor price, offered price, and margin per line
Approve	One-click approval; status changes to Approved; sales rep notified
Counter-offer	Edit adjusted prices per line item, add notes, send; status changes to Counter-Offered
Reject	Select rejection reason, add notes; status changes to Rejected; sales rep notified
Historical quote view	Read-only view of approved, counter-offered, or rejected quotes with outcome details

Quote Approval Actions

Action	Actor	Status After	Notification
Approve	Sales Manager	Approved	Green toast
Counter-Offer	Sales Manager	Counter-Offered	Amber toast
Reject	Sales Manager	Rejected	Red toast

Rejection Reasons

Price Below Acceptable, Account on Hold, Margin Too Low, Product Unavailable, Customer Credit Issue, Other

Stage 7 — Calendar & Meeting Scheduling

A calendar interface integrated with Microsoft Office 365 that allows sales reps to schedule, view, and manage customer meetings and internal appointments, with automatic Outlook calendar invites.

Feature	Description
Weekly calendar view	7-column grid (Mon–Sun) with time slots 8am–5pm; meeting blocks placed at correct times
Monthly calendar view	Full-month grid with meeting indicators (coloured dot + title) per day
Calendar navigation	Previous/Next arrows for week or month; Today button returns to current period
Office 365 connection status	Banner showing connected email address and last sync timestamp
Create meeting	Enter title, description, date, start/end time, meeting type, customer, and location; optionally send Outlook calendar invite
Outlook calendar invite	Invite sent to customer and rep via Office 365 when option is selected
Meeting colour-coding	Meetings colour-coded by type for at-a-glance distinction
Meeting detail popup	Click a meeting block to view title, customer, type, location, and description
Upcoming meetings sidebar	Next 3–4 meetings listed with type, title, time, and customer name
Edit meeting	Update time, description, or location; Outlook invite updated if applicable
Cancel meeting	Remove meeting from calendar; cancellation notice sent via Outlook if an invite was sent

Meeting Types

Type	Colour	Use Case
Customer Review	Blue	Regular account check-in
Quote Discussion	Purple	Quote negotiation or presentation
Support Follow-up	Amber	Follow-up on an escalated ticket
Product Demo	Green	Product demonstration
Onboarding	Blue	New customer onboarding call
Internal	Grey	Internal team meetings

Meeting Location Options

Microsoft Teams, Phone Call, PCS Miami Office, PCS Dallas Office, Other
