Stage 1 — Core Functionality

PCS Operations and Sales Portal — Business Requirements

Document Version: 1.2
Date: May 6, 2026
Status: Draft — Pending Business Sign-Off
Prepared by: Development Team
Review Required From: Business Stakeholders

Purpose

This document describes the functionality of the PCS Wireless Operations and Sales Portal. **Stage 1** is fully scoped with user stories and use cases for business sign-off. Remaining features are summarised by feature area for visibility; each will receive its own full requirements and sign-off process before entering development.

Please review Stage 1 and indicate:

- **Approved** — functionality is correct as described
- **Change Required** — something needs to be different (add comment)
- **Out of Scope** — functionality should be removed or deferred

Delivery Stages

Stage	Scope	Status
Stage 1	Authentication, Support Ticket Agent View, Customer Search & List, Customer 360 — Core	This document
Future	RMA Management, Dashboard KPIs, Inventory Browser, Quote Creation & Approvals, Customer Analytics & AI Insights, Calendar & Meeting Scheduling	Upcoming

Table of Contents

1. [Stage 1 — Core Functionality](#)
 2. [User Roles & Permissions](#)
 3. [Out of Scope](#)
-

1. Stage 1 — Core Functionality

Stage 1 delivers the foundational layer of the Operations and Sales Portal: authentication, the support ticket agent view, and core customer account management. These features provide immediate operational value and establish the data and access patterns used by all future stages.

1.1 Authentication

Authentication is powered by Auth0 integrated with Microsoft Entra ID. Staff log in with their existing @pcsw.com Microsoft account — no separate credentials are required. Non-PCS accounts are rejected at the Auth0 layer. Session management and token handling are managed by Auth0.

User Stories

US-B-01 — As a staff member, I want to log in to the Operations and Sales Portal using my PCS Microsoft account so that I do not need a separate username and password.

Use Cases

ID	Use Case	Actor	Outcome
UC-B-01	Sign in via Auth0 / Entra ID	Staff Member	Authenticated using @pcsw.com credentials via Auth0; non-PCS accounts are rejected with a message directing the user to IT; on success, user is taken to the main portal view

1.2 Support Ticket Agent View

A two-panel support interface allowing sales reps and support agents to view, manage, and respond to customer support tickets.

User Stories

US-B-02 — As a support agent, I want to see a list of all customer support tickets so that I can triage and respond to open requests.

US-B-03 — As a support agent, I want to filter tickets by status (Open, In Progress, Waiting, Resolved) so that I can focus on tickets that need attention.

US-B-04 — As a support agent, I want to filter tickets by priority (Urgent, High, Normal, Low) so that I can handle the most critical issues first.

US-B-05 — As a support agent, I want to filter tickets by category (Order Issue, Shipping, RMA, Billing, Quote, Certificate, General) so that I can work through a specific type of request.

US-B-06 — As a support agent, I want to filter tickets by assigned sales rep so that I can view only the tickets relevant to my accounts.

US-B-07 — As a support agent, I want to select a ticket from the list and see the full conversation thread in a detail panel so that I can understand the complete history before responding.

US-B-08 — As a support agent, I want to read customer messages and previous agent replies in a clear threaded view so that I can follow the dialogue without confusion.

US-B-09 — As a support agent, I want to type and send a reply to a customer ticket so that I can respond to their request directly from the portal.

US-B-10 — As a support agent, I want to add an internal note to a ticket that is only visible to staff so that I can communicate context to colleagues without the customer seeing it.

US-B-11 — As a support agent, I want to change the status of a ticket (Open → In Progress → Waiting → Resolved) so that the ticket lifecycle is accurately tracked.

US-B-12 — As a support agent, I want to change the priority of a ticket so that escalations are reflected immediately.

US-B-13 — As a support agent, I want to reassign a ticket to another agent or sales rep so that the right person handles the issue.

US-B-14 — As a support agent, I want to see a visual priority indicator (colour-coded dot) on each ticket in the list so that I can spot urgent tickets at a glance without reading every row.

US-B-15 — As a support agent, I want to see an empty state when no ticket is selected so that the interface is clear and I know to choose a ticket from the list.

Use Cases

ID	Use Case	Actor	Outcome
UC-B-02	View ticket list	Agent	All tickets displayed with ID, subject, customer, category, priority indicator, status, and last updated timestamp
UC-B-03	Filter by status	Agent	Ticket list filtered to the selected status; count updates
UC-B-04	Filter by priority	Agent	Ticket list filtered to the selected priority level
UC-B-05	Filter by category	Agent	Ticket list filtered to the selected category

ID	Use Case	Actor	Outcome
UC-B-06	Filter by sales rep	Agent	Ticket list filtered to tickets assigned to the selected rep
UC-B-07	Select ticket	Agent	Right panel displays the full ticket detail and conversation thread; selected ticket highlighted in list
UC-B-08	Deselect ticket	Agent	Pressing Escape or clicking elsewhere deselects the ticket; right panel returns to empty state
UC-B-09	Read conversation thread	Agent	Customer messages shown right-aligned (blue); agent messages shown left-aligned (white with Agent badge); internal notes shown left-aligned (amber with Internal Note badge, italic text)
UC-B-10	Reply to ticket	Agent	Agent types reply in textarea, clicks Send; message added to thread with agent name, timestamp, and Agent badge; customer is notified
UC-B-11	Add internal note	Agent	Agent switches to Internal Note mode, types note, clicks Add; note appears in thread with amber background and Internal Note badge; not visible to customer
UC-B-12	Change ticket status	Agent	Status dropdown updated; change reflected in ticket list and detail header immediately
UC-B-13	Change ticket priority	Agent	Priority dropdown updated; priority indicator in ticket list updates immediately
UC-B-14	Reassign ticket	Agent	Assignee dropdown updated to selected agent or sales rep
UC-B-15	View empty state	Agent	When no ticket is selected, right panel displays a centred icon and "Select a ticket to view details" message

Ticket Status Definitions

Status	Meaning
Open	Ticket has been submitted and is awaiting first response
In Progress	A staff member is actively working on the issue
Waiting	Response has been sent; awaiting customer reply
Resolved	Issue has been closed

Ticket Priority Definitions

Priority	Indicator	Meaning
Urgent	Red dot	Business-critical issue requiring immediate response
High	Amber dot	Important issue to be addressed same day
Normal	Blue dot	Standard request with no time pressure
Low	Grey dot	Minor or informational request

Ticket Categories

Order Issue, Shipping, RMA Enquiry, Billing, Quote, Certificate, General

Reply vs Internal Note

Mode	Visibility	Background
Reply	Customer and staff	White (agent message)
Internal Note	Staff only	Amber

1.3 Customer Search & List

A searchable, filterable directory of customer accounts. Sales reps and managers can locate accounts quickly and navigate directly to the Customer 360 view.

User Stories

US-B-16 — As a sales rep, I want to search for a customer by company name, email address, or phone number so that I can quickly find the account I need.

US-B-17 — As a sales rep, I want to filter the customer list by account status (Active, On Hold, Suspended) so that I can identify accounts that require attention.

US-B-18 — As a sales rep, I want to see a count of matching customer records so that I know how many results are returned.

US-B-19 — As a sales rep, I want to click a customer row to open their account so that I can view their full details.

Use Cases

ID	Use Case	Actor	Outcome
UC-B-16	Search customers	Sales Rep / Manager	Real-time filtering of list by company name, email address, or phone number

ID	Use Case	Actor	Outcome
UC-B-17	Filter by account status	Sales Rep / Manager	Customer list filtered to Active, On Hold, or Suspended accounts
UC-B-18	View result count	Sales Rep / Manager	Count of matching records shown (e.g. "Showing 12 customers")
UC-B-19	Open customer account	Sales Rep / Manager	Navigates to the Customer 360 view for the selected customer

1.4 Customer 360 View

A profile view for each customer account. Stage 1 delivers the account header and the Portal Users tab, which enables sales reps to manage who has access to the customer-facing portal on behalf of the account.

User Stories

US-B-20 — As a sales rep, I want to view a customer's key account information (company name, status, location, sales rep, primary contact, credit limit, account age) so that I have full context before interacting with the account.

US-B-21 — As a sales rep, I want to see a list of authorised portal users for a customer account so that I know who currently has access on the customer's behalf.

US-B-22 — As a sales rep, I want to invite a new portal user for a customer account so that I can grant them access to the customer portal.

US-B-23 — As a sales rep, I want to reset the password for a portal user so that I can help them regain access without contacting IT.

US-B-24 — As a sales rep, I want to deactivate a portal user so that I can revoke access when a contact leaves the customer's organisation.

Use Cases

ID	Use Case	Actor	Outcome
UC-B-20	View customer header	Sales Rep / Manager	Company name, status badge, location, assigned sales rep, primary contact, credit limit, available credit, and account age displayed
UC-B-21	View portal users	Sales Rep / Manager	Table of authorised portal users with name, email, role, and status
UC-B-22	Invite portal user	Sales Rep / Manager	Invitation email sent to the specified address; user record created with Pending status

ID	Use Case	Actor	Outcome
UC-B-23	Reset portal user password	Sales Rep / Manager	Password reset email sent to the user's registered email address
UC-B-24	Deactivate portal user	Sales Rep / Manager	User status set to Inactive; customer portal access revoked immediately

2. User Roles & Permissions

Role Definitions

Role	Description
Sales Representative	Full access to all Stage 1 features; cannot approve quotes in future stages
Sales Manager	Full access to all stages including future quote approvals and AI insights
Support Agent	Access to support ticket view only; cannot access customer accounts or financial data

Access Matrix — Stage 1

Feature	Sales Rep	Sales Manager	Support Agent
Sign in via Auth0 / Entra ID	✓	✓	✓
View support tickets	✓	✓	✓
Reply to tickets	✓	✓	✓
Add internal notes	✓	✓	✓
Change ticket status / priority / assignee	✓	✓	✓
Search & view customer list	✓	✓	—
View Customer 360	✓	✓	—
Manage portal users (invite / reset / deactivate)	✓	✓	—

3. Out of Scope

The following features are planned for future delivery. Each feature area will receive its own full requirements and sign-off process before development begins.

Feature Area	Description
Backoffice Dashboard	Account-wide KPI cards (Total Customers, Open RMAs, Open Tickets, Pending Quotes, Revenue MTD), quick action buttons, recent activity feed, and upcoming meetings panel
RMA Management Queue	Centralised queue for reviewing, approving, or refusing customer return requests; resolution tracking with credit memo, replacement, or partial credit outcomes
Advanced Customer 360	Invoice history, financial aging breakdown, shipments, RMA history, open quotes, and chronological account activity log
Inventory Browser	Live inventory view across warehouse locations with tier pricing, floor prices, low-stock indicators, and margin colour coding
Quote Creation Tool	Build and submit custom product quotes for customers, with product catalog browsing, custom pricing, draft saving, and manager submission
Quote Approvals	Manager-only approval queue for reviewing, approving, counter-offering, or rejecting submitted quotes
Customer Analytics & AI Insights	Purchase behaviour analytics, AI-generated account summaries, at-risk customer alerts, aging inventory recommendations, and customer segmentation
Calendar & Meeting Scheduling	Office 365–integrated calendar for scheduling and managing customer meetings with Outlook invite sync
