Stage 1 — Core Functionality

PCS Wireless Customer Portal — Business Requirements

Document Version: 1.0

Date: May 7, 2026

Stage: Stage 1 — Core Functionality

Status: Draft — Pending Business Sign-Off

Prepared by: Development Team

Review Required From: Business Stakeholders

Purpose

This document describes all functionality included in **Stage 1** of the PCS Wireless Customer Portal. It is intended for business stakeholder review to confirm the Stage 1 feature set is complete and accurate before development of the live backend is finalized.

Out of scope items are listed in Section 12 for visibility but are **not** in scope for this sign-off.

Please review each section and indicate:

- **Approved** — functionality is correct as described
 - **Change Required** — something needs to be different (add comment)
 - **Out of Scope** — functionality should be removed from Stage 1
-

Delivery Stages

Stage	Scope	Status
Stage 1	Authentication (Auth0), Dashboard, Orders, Shipments, Financial, Support, Settings & Profile	This document
Future	Feature areas listed in Section 12 — not yet assigned to delivery stages	Upcoming

1. Authentication & Access

User Stories

US-01 — As a customer, I want to log in to the portal so that I can securely access my account.

US-02 — As a customer, I want to be able to reset my password if I have forgotten it so that I can regain access to my account.

US-03 — As an existing PCS customer, I want to receive portal login credentials from PCS staff so that I can begin managing my orders and account online.

US-04 — As a customer, I want the portal to prevent access to all pages unless I am logged in, so that my account data is protected.

Note: The portal is initially being rolled out to **existing PCS customers**. In Stage 1, portal access is provisioned by PCS staff for customers who already have an account with PCS. The self-service New Customer Application wizard — allowing prospective customers to apply for a new PCS account online — is out of scope for Stage 1.

Use Cases

ID	Use Case	Actor	Outcome
UC-01	Log in	Customer	User is authenticated and directed to the Dashboard

ID	Use Case	Actor	Outcome
UC-02	Reset forgotten password	Customer	User requests a password reset and receives an email to set a new password
UC-03	Receive portal access	Existing customer	PCS staff provisions portal access for an existing customer; customer receives credentials and can log in
UC-04	Access protected page without login	Unauthenticated user	User is redirected to the login page

2. Dashboard

User Stories

US-06 — As a customer, I want to see a summary of my account at a glance when I log in, so that I can quickly understand the current state of my business.

US-07 — As a customer, I want to see key metrics on the dashboard — open orders, pending shipments, outstanding balance, and open support tickets — so that I know where attention is needed.

US-08 — As a customer, I want to be alerted if I have past-due invoices directly on the dashboard, so that I can take immediate action.

US-09 — As a customer, I want a quick-action button on the dashboard to contact support, so that I can raise a request without navigating through menus.

US-10 — As a customer, I want to see a recent activity feed on the dashboard so that I can catch up on account events since my last visit.

Use Cases

ID	Use Case	Actor	Outcome
UC-06	View account KPIs	Customer	Dashboard displays: count of open orders, pending shipments, outstanding balance, and open support tickets
UC-07	View past-due alert	Customer	A banner alerts the customer to past-due invoice amounts with a link to the Financial page
UC-08	Use Quick Action	Customer	Customer clicks Contact Support and is taken to the Support page to raise a ticket
UC-09	View recent activity	Customer	The last several account events are displayed in chronological order with links to related records

3. Order Management

User Stories

US-12 — As a customer, I want to see a list of all my orders so that I can track what I have purchased.

US-13 — As a customer, I want to filter my orders by status (All, Processing, Shipped, Delivered, On Hold) so that I can focus on the orders that need attention.

US-14 — As a customer, I want to search my orders by Order ID or PO Number so that I can quickly find a specific order.

US-15 — As a customer, I want to view full details for a specific order — including line items, pricing, shipping details, and status timeline — so that I have complete visibility into each purchase.

US-16 — As a customer, I want to see an order status timeline so that I can understand exactly where my order is in the fulfillment process.

US-17 — As a customer, I want to download documents associated with an order (Invoice, Packing List, Bill of Lading) so that I have records for my internal use.

US-18 — As a customer, I want to export my order list so that I can use the data in my own systems. — As a customer, I want to export my order list so that I can use the data in my own systems.

Use Cases

ID	Use Case	Actor	Outcome
UC-11	View order list	Customer	All orders displayed with Order ID, PO Number, date, status, item count, and total value
UC-12	Filter orders by status	Customer	List is filtered to show only orders of the selected status; KPI cards show count and value per status
UC-13	Search orders	Customer	List is filtered in real-time to orders matching the entered Order ID or PO Number
UC-14	View order detail	Customer	Full order record shown including: dates, addresses, line items table, status timeline, tracking info, and associated documents
UC-15	Download order documents	Customer	Invoice, Packing List, or Bill of Lading file is downloaded to the user's device
UC-16	Download all order documents	Customer	All documents for the order are downloaded together
UC-17	Export order list	Customer	Order data is exported as a file (e.g. CSV)

Order Data Fields

Each order record includes the following information:

Field	Description
Order ID	PCS-assigned order number (e.g. PCS-2024-1847)
PO Number	Customer's own purchase order number
Order Date	Date the order was placed
Status	Processing / Shipped / Delivered / On Hold
Items	Count of devices in the order
Total Value	Dollar value of the order
Ship From	Origin facility name and location
Ship To	Destination address
Line Items	Product, SKU, Grade (A/B), Storage, Qty, Unit Price, Total
Tracking	Carrier, tracking number, and ETA (when available)
Documents	Invoice, Packing List, Bill of Lading

4. Shipment Tracking

User Stories

US-20 — As a customer, I want to see all shipments associated with my account so that I can monitor the delivery of my orders.

US-21 — As a customer, I want to filter shipments by status (In Transit, Delivered, Pickup Ready, Exception) so that I can focus on shipments needing action.

US-22 — As a customer, I want to view the current status of my shipments so that I can see where they are and whether any action is needed.

US-23 — As a customer, I want to see the most recent status update for a shipment so that I have the latest information available.

US-24 — As a customer, I want to access shipment documents (Bill of Lading, Packing List) so that I have the paperwork I need for receiving.

Note: Real-time carrier tracking integration and customer pickup authorization workflows require operational readiness and carrier agreements not yet in place for Stage 1. Shipment status will reflect information

available from PCS's internal systems. These capabilities will be revisited for a future stage.

Use Cases

ID	Use Case	Actor	Outcome
UC-19	View shipment list	Customer	All shipments shown with Shipment ID, associated Order ID, carrier, status, and ETA
UC-20	Filter shipments by status	Customer	List filtered to the selected status type
UC-21	View shipment detail	Customer	Shipment record shown with current status, last update, shipping details, and associated documents
UC-22	Download Bill of Lading	Customer	BOL document downloaded to user's device
UC-23	Download Packing List	Customer	Packing List document downloaded

5. Financial Management

User Stories

US-30 — As a customer, I want to see a summary of my account financial position — total outstanding, past due, credit limit, and payment terms — so that I can manage my payments effectively.

US-31 — As a customer, I want to see an aging breakdown of my outstanding balance (Current, 30, 60, 90+ days) so that I can prioritize which invoices to pay.

US-32 — As a customer, I want to view all my invoices with their status so that I can track what is paid and what is owed.

US-33 — As a customer, I want to view the full details of an invoice — including line items and payment history — so that I can verify charges and reconcile my records.

US-34 — As a customer, I want to download an invoice as a PDF so that I can share or store it.

US-35 — As a customer, I want to download a full account statement so that I can reconcile my account.

US-36 — As a customer, I want to dispute an invoice so that I can flag incorrect charges for review.

US-37 — As a customer, I want to view all payments I have made, including method, date, amount, and which invoices they were applied to, so that I can maintain accurate payment records.

US-38 — As a customer, I want to view all credit memos on my account, including the reason, any associated RMA reference number, and applied invoice, so that I understand any credits I have received.

Use Cases

ID	Use Case	Actor	Outcome
UC-29	View financial summary	Customer	Dashboard KPIs show: total outstanding, past due, credit limit, available credit, and payment terms
UC-30	View aging summary	Customer	Outstanding balance broken down into aging buckets: Current, 30, 60, 90+ days
UC-31	View invoice list	Customer	All invoices shown with ID, order, date, due date, amount, balance, and status
UC-32	Filter invoices by status	Customer	List filtered to Open, Past Due, or Paid invoices
UC-33	View invoice detail	Customer	Full invoice shown: bill-to address, line items, subtotal, tax, total, payment terms, payment history
UC-34	Download invoice PDF	Customer	Invoice downloaded as a PDF file
UC-35	Download account statement	Customer	Full account statement downloaded
UC-36	Dispute an invoice	Customer	Customer can flag an invoice for review; support is notified
UC-37	View payment list	Customer	All payments shown with reference ID, date, amount, method, and applied invoices
UC-38	View payment detail	Customer	Full payment record: company, bank, confirmation number, applied-to invoice list
UC-39	View credit memo list	Customer	All credit memos shown with ID, date, amount, reason, and status
UC-40	View credit memo detail	Customer	Full credit memo: issued to, RMA reference, applied invoice, notes, line items
UC-41	View RMA reference on credit memo	Customer	The RMA reference number is displayed on the credit memo as a read-only field (full RMA module is out of scope for Stage 1)

6. Activity Log

User Stories

US-40 — As a customer, I want to see a chronological log of all activity on my account so that I have a full audit trail.

US-41 — As a customer, I want to filter the activity log by category (Orders, Shipments, Payments, Support) so that I can find relevant events quickly.

US-42 — As a customer, I want activities that require my attention to be visually flagged so that I don't miss important actions.

US-43 — As a customer, I want each activity entry to link to the related record (order, invoice, ticket) so that I can navigate directly to the relevant page.

US-44 — As a customer, I want activity entries grouped by date so that I can easily scan by time period.

Use Cases

ID	Use Case	Actor	Outcome
UC-43	View full activity log	Customer	All account events shown in reverse-chronological order, grouped by date
UC-44	Filter by category	Customer	Log filtered to the selected category (All, Orders, Shipments, Payments, Support)
UC-45	View items requiring action	Customer	Activities with pending actions are badged; customer can click through to take action
UC-46	Navigate from activity to record	Customer	Clicking an activity entry navigates to the related order, invoice, or ticket
UC-47	Load more activities	Customer	Additional activities are loaded on demand ("Load More")

7. Support Tickets

User Stories

US-45 — As a customer, I want to submit a support ticket so that I can get help from the PCS team.

US-46 — As a customer, I want to view all my open and historical support tickets so that I can track the status of my requests.

US-47 — As a customer, I want to filter tickets by status and category so that I can find specific tickets quickly.

US-48 — As a customer, I want to read the full conversation thread for a support ticket so that I can follow the dialogue between myself and the support team.

US-49 — As a customer, I want to reply to a ticket so that I can provide additional information or follow up on a request.

US-50 — As a customer, I want to attach files to a support message so that I can share relevant documents or images with the support team.

US-51 — As a customer, I want to see which PCS team member is assigned to my ticket so that I know who is handling my issue.

US-52 — As a customer, I want to see if a ticket is linked to a specific order so that I can understand the context of the issue.

US-53 — As a customer, I want to set the priority of a new support ticket (Normal or Urgent) so that urgent issues are flagged to the support team immediately.

US-54 — As a customer, I want to optionally link a support ticket to an Order ID or Quote ID so that the support team has the relevant context without needing to ask for it.

US-55 — As a customer, I want to rate my experience after a support ticket is resolved so that I can provide feedback on the service I received.

Use Cases

ID	Use Case	Actor	Outcome
UC-48	View ticket list	Customer	All tickets shown with ID, title, category, priority, status, and last updated time
UC-49	Filter tickets by status	Customer	Ticket list filtered to the selected status
UC-50	Filter tickets by category	Customer	Ticket list filtered to the selected category
UC-51	View ticket detail	Customer	Full ticket shown: title, priority, status, category, created date, assigned team, related order, and full conversation thread
UC-52	Reply to ticket	Customer	Customer types a reply and submits it; message is added to the conversation thread
UC-53	Attach file to reply	Customer	Customer can attach a file to a support message

ID	Use Case	Actor	Outcome
UC-54	Create new ticket	Customer	Customer submits a new support request with category, subject, description, priority, optional linked record, and optional file attachments
UC-55	Set ticket priority	Customer	Customer selects Normal or Urgent when creating a ticket; priority is visible to the support team
UC-56	Link ticket to order or quote	Customer	Customer optionally enters an Order ID or Quote ID; reference displayed in the ticket detail for the support team
UC-57	Rate resolved ticket	Customer	After a ticket is marked Resolved, customer is presented with a star rating; rating is submitted and recorded

8. Account Settings

User Stories

US-56 — As an Admin, I want to update my company's business information (name, address, phone, email) so that our account details are accurate.

US-57 — As an Admin, I want to manage our tax exemption status and upload a tax certificate so that our orders are processed correctly.

US-58 — As an Admin, I want to invite new users to our account so that my team members can access the portal.

US-59 — As an Admin, I want to assign roles to team members (Admin, Buyer, Viewer) so that each person has the appropriate level of access.

US-60 — As an Admin, I want to activate or deactivate user accounts so that I can control who has access.

US-61 — As a customer, I want to choose my preferred theme (Light, Dark, or System) so that the portal is comfortable to use.

US-62 — As a customer, I want to control which email and SMS notifications I receive so that I am only alerted about the things that matter to me.

US-63 — As a customer, I want to set my regional preferences (currency, timezone, date format) so that information is displayed in a format familiar to me.

US-64 — As a customer, I want to change my password so that I can maintain account security.

US-65 — As a customer, I want to enable Two-Factor Authentication (via Authenticator App or SMS) so that my account is more secure.

US-66 — As a customer, I want to view and revoke active sessions so that I can ensure no unauthorized devices are logged in.

Use Cases

ID	Use Case	Actor	Outcome
UC-58	Edit company details	Admin	Company name, address, phone, and email updated and saved
UC-59	Upload tax certificate	Admin	Tax certificate file uploaded; exemption status updated
UC-60	Invite user	Admin	Invitation email sent to new user; they appear as pending in the user list
UC-61	Assign/change user role	Admin	User's role updated to Admin, Buyer, or Viewer
UC-62	Deactivate user	Admin	User's access is suspended; they cannot log in
UC-63	Reactivate user	Admin	User's access is restored
UC-64	Change theme	Customer	Selected theme (Light/Dark/System) applied and persisted
UC-65	Toggle email notification	Customer	Notification preference saved; emails sent or suppressed accordingly
UC-66	Toggle SMS notification	Customer	SMS notification preference saved
UC-67	Update regional settings	Customer	Currency, timezone, and date format preferences saved and applied to display
UC-68	Change password	Customer	Password updated after verifying current password
UC-69	Enable 2FA	Customer	Two-Factor Authentication activated via Authenticator App or SMS
UC-70	Revoke active session	Customer	Selected device session is terminated

9. Navigation & Global UI

User Stories

US-67 — As a customer on desktop, I want a persistent sidebar navigation so that I can move between sections of the portal quickly.

US-68 — As a customer on mobile, I want a bottom tab bar and a hamburger menu drawer so that navigation is accessible and familiar on a small screen.

US-69 — As a customer, I want to see the name and contact details of my PCS Sales Representative in the navigation so that I can reach them easily.

US-70 — As a customer, I want the portal to work well on both mobile and desktop screens so that I can use it from any device.

Use Cases

ID	Use Case	Actor	Outcome
UC-71	Use sidebar navigation	Customer (desktop)	Persistent sidebar displays all navigation links; active page is highlighted; clicking any link navigates to that section
UC-72	Use mobile navigation	Customer (mobile)	Bottom tab bar shows primary navigation items; hamburger menu opens a full drawer with all navigation links
UC-73	View sales rep details	Customer	Sales rep name, phone, and email are displayed in the navigation panel; customer can click to initiate contact
UC-74	Use portal on mobile device	Customer	All pages render correctly on mobile screen sizes; layout adapts to the viewport without loss of functionality

Navigation Structure

```

10. Notifications

User Stories

US-71 — As a customer, I want to receive email notifications for key account events so that I am kept informed without needing to log in.

US-72 — As a customer, I want to receive SMS notifications for urgent account events such as upcoming payment due dates so that I can act quickly.

US-73 — As a customer, I want to see a notification bell in the portal so that I can view in-app alerts.

Use Cases

ID	Use Case	Actor	Outcome
UC-75	Receive email notification	Customer	When a key account event occurs (order confirmed, shipment update, invoice generated), customer receives a formatted email notification
UC-76	Receive SMS notification	Customer	When an urgent account event occurs (e.g. payment due reminder), customer receives an SMS alert
UC-77	View in-app notifications	Customer	Notification bell in the portal header shows an unread count badge; clicking opens a panel listing recent alerts; clicking an alert navigates to the relevant record

11. User Roles & Permissions

Role Definitions

Role	Permissions
Admin	Full access to all features including user management, company settings, and security
Buyer	Can view orders, shipments, and financials; can submit support tickets; cannot manage users or integrations
Viewer	Read-only access to orders, shipments, and financials; cannot create or modify records

Access Matrix

Feature	Admin	Buyer	Viewer
View Dashboard	✓	✓	✓
View Orders	✓	✓	✓
View Shipments	✓	✓	✓
View Financial	✓	✓	✓
Dispute Invoice	✓	✓	—
View Activity Log	✓	✓	✓

Edit Company Details	✓	—	—
Edit Own Preferences	✓	✓	✓
Change Own Password	✓	✓	✓
Enable Own 2FA	✓	✓	✓

12. Out of Scope

The following functionality is not included in Stage 1. Items have not been committed to specific future stages; prioritisation and scheduling will be decided separately.

RMA / Returns

Feature	Description
Submit RMA request	Customer selects an order, enters device IMEIs, selects a complaint reason, optionally uploads evidence, and submits
Complaint categories	Options including: Dead Pixel, Cracked LCD, Battery Drain, WiFi Not Working, Bluetooth, Charging Port, Speaker/Mic, Face ID, Touch ID, Camera, Water Damage, Cosmetic Damage, Wrong Item, Missing Accessories, Software Issue, Carrier Lock, IMEI Mismatch, Other

Feature	Description
RMA status tracking	Customer tracks progress: Submitted → Under Review → Approved → Shipped → Received → Diagnostic → Complete
RMA detail view	Full RMA record showing IMEIs, models, complaint reasons, and resolution
RMA list	Customer can view all open and historical RMA requests with status filtering
Credit memo download	Customer can download the credit memo generated from an approved RMA
Return shipping labels	Customer can download or request a pre-paid return shipping label
RMA notifications	Email/SMS alerts for RMA status changes
Dashboard KPI	Open RMAs KPI card added to the dashboard

New Customer Application

New customers can complete a self-service application wizard to register their business and request a PCS account.

Step	Title	Key Fields / Actions
1	Company Information	Legal business name, trading name, company registration number, VAT/tax ID, industry vertical, website URL
2	Contact Details	Primary contact name, job title, email, phone; billing address; optional shipping address toggle
3	Business Profile	Years in operation, estimated monthly volume, device types of interest, countries of operation
4	Document Upload	Certificate of incorporation, proof of address, photo ID
5	Review & Submit	Summary, T&Cs confirmation, Submit Application; customer receives a reference number

Integrations

Feature	Description
API key management	Admins can view, copy, and regenerate production and test API keys

Feature	Description
Webhook configuration	Admins can manage webhook endpoints with event subscriptions
ERP/WMS integration	Connect SAP or NetSuite; view sync status and trigger manual syncs
Custom integrations	Configure additional third-party integrations

Catalog, Quotes & Promotional Banners

Feature	Description
Promotional offers on dashboard	A "Hottest Offers" section highlighting current deals and featured inventory
Device catalog	Browse available devices with filter sidebar and sort options
Quote cart	Build a quote with custom per-unit pricing; submit for PCS review
My Quotes	View and manage submitted quotes with full status history
Promotional banners	Full-width banners on dashboard and catalog surfacing featured deals

Meeting Scheduler

Feature	Description
Book a meeting	Customer schedules a call or meeting with their assigned PCS Sales Representative
Calendar availability	Available time slots pulled from the sales rep's calendar
Meeting confirmation	Confirmation email and calendar invite sent to both parties
Meeting history	Customer can view upcoming and past meetings
Reschedule / cancel	Customer can reschedule or cancel an upcoming meeting

Shipment Enhancements

Feature	Description
Carrier tracking link	Direct link to the carrier's tracking page for real-time updates (requires carrier integration agreements)
Customer pickup authorization	Driver registration, saved pickup contacts, and pickup authorization document generation (requires Operations process definition)

Feature	Description
Delivery SMS notifications	SMS alerts for shipment delivery events (requires carrier integration)

Orders

Feature	Description
Reorder	Repeat a previous order pre-populated with the same items

Financial

Feature	Description
Invoice payment initiation	Customer initiates payment against an outstanding invoice directly in the portal
Online payment processing	Credit card and other direct payment methods

General

- Real-time / live chat with support
- Custom reporting or data analytics dashboard
- Multi-currency billing
- Native mobile app (iOS / Android)
- Passwordless login and passkey authentication (Auth0-supported; not enabled in Stage 1)
