

PCS Wireless Customer Portal — Business Requirements

Document Version: 1.0
Date: July 2, 2026
Stage: Stage 3 — Integrations, Automation & Advanced
Status: Draft — Pending Business Sign-Off
Prepared by: Development Team
Review Required From: Business Stakeholders

Purpose

This document describes all functionality included in **Stage 3** of the PCS Wireless Customer Portal. Stage 3 covers capabilities that depend on external readiness — carrier agreements, ERP connectivity, calendar integration, and payment/telephony vendors — as well as prospect-facing self-service onboarding.

Stage 3 features were previously listed under "Out of Scope" in the Stage 1 requirements and are formalised here as user stories and use cases. Because several of these features carry **external prerequisites**, each dependency is called out explicitly so that scheduling can account for it.

Please review each section and indicate:

- **Approved** — functionality is correct as described
- **Change Required** — something needs to be different (add comment)
- **Out of Scope** — functionality should be deferred or removed

Delivery Stages

Stage	Scope	Status
Stage 1	Authentication (Auth0), Dashboard, Orders, Shipments, Financial, Support, Settings & Profile	Delivered / In progress
Stage 2	Returns (RMA), Catalog & Sales Estimates, Online Payments, Reorder	See Stage 2 requirements
Stage 3	Integrations, Shipment Enhancements, New Customer Application, Meeting Scheduler, advanced backlog	This document

Table of Contents

1. [Integrations](#)
2. [Shipment Enhancements](#)
3. [New Customer Application](#)
4. [Meeting Scheduler](#)

- 5. [General & Advanced \(Epics\)](#)
- 6. [Dashboard Additions](#)
- 7. [User Roles & Permissions](#)
- 8. [Out of Scope for Stage 3](#)

1. Integrations

Admins can connect the portal to their own systems and to PCS's fulfilment systems, and manage programmatic access.

Prerequisite: A published PCS public API and webhook infrastructure must be available before this feature can be delivered.

User Stories

US-110 — As an Admin, I want to view, copy, and regenerate production and test API keys so that I can integrate the portal with my own systems.

US-111 — As an Admin, I want to configure webhook endpoints and subscribe them to specific events so that my systems are notified when account events occur.

US-112 — As an Admin, I want to view the delivery status of recent webhook events so that I can diagnose integration issues.

US-113 — As an Admin, I want to connect an ERP/WMS system (SAP or NetSuite) so that portal data stays in sync with my back-office systems.

US-114 — As an Admin, I want to see the sync status of a connected ERP/WMS and trigger a manual sync so that I can confirm data is up to date.

US-115 — As an Admin, I want to configure additional third-party integrations so that I can extend the portal to other tools we use.

US-116 — As an Admin, I want to revoke an API key or disable an integration so that I can immediately cut off access when needed.

Use Cases

ID	Use Case	Actor	Outcome
UC-110	Manage API keys	Admin	Production and test API keys are viewed, copied, or regenerated
UC-111	Configure webhook	Admin	A webhook endpoint is added with a selected set of event subscriptions
UC-112	View webhook deliveries	Admin	Recent webhook delivery attempts are shown with status and response codes
UC-113	Connect ERP/WMS	Admin	SAP or NetSuite connection is configured and authorised

ID	Use Case	Actor	Outcome
UC-114	View sync status / manual sync	Admin	Last sync time and status shown; a manual sync can be triggered
UC-115	Configure custom integration	Admin	An additional third-party integration is configured
UC-116	Revoke access	Admin	An API key is revoked or an integration disabled; access stops immediately

2. Shipment Enhancements

Extends the Stage 1 Shipment Tracking module with real-time carrier data, customer pickup workflows, and delivery alerts.

Prerequisites: Carrier tracking and delivery SMS require carrier integration agreements. Customer pickup authorization requires an Operations process definition. These must be in place before the corresponding stories are delivered.

User Stories

US-120 — As a customer, I want a direct link to the carrier's tracking page for a shipment so that I can see real-time delivery updates. *(Requires carrier integration agreements.)*

US-121 — As a customer, I want to register a driver and save pickup contacts so that authorised people can collect shipments on my behalf. *(Requires Operations process definition.)*

US-122 — As a customer, I want to generate a pickup authorization document so that my driver can present proof of authorization at collection. *(Requires Operations process definition.)*

US-123 — As a customer, I want to receive SMS alerts for shipment delivery events so that I know when a shipment has been delivered. *(Requires carrier integration.)*

US-124 — As a customer, I want to manage my saved pickup contacts so that I can keep the authorised list current.

US-125 — As a customer, I want to see which shipments are eligible for pickup so that I know when the pickup workflow applies.

Use Cases

ID	Use Case	Actor	Outcome
UC-120	Open carrier tracking	Customer	A direct link opens the carrier's real-time tracking page for the shipment
UC-121	Register driver / pickup contact	Customer	A driver or pickup contact is registered and saved to the account
UC-122	Generate pickup authorization	Customer	A pickup authorization document is generated for download

ID	Use Case	Actor	Outcome
UC-123	Receive delivery SMS	Customer	An SMS alert is sent when a shipment is delivered, per notification preferences
UC-124	Manage pickup contacts	Customer	Saved pickup contacts are added, edited, or removed
UC-125	View pickup-eligible shipments	Customer	Shipments eligible for customer pickup are identified in the shipment list

3. New Customer Application

A self-service application wizard allowing prospective customers to register their business and request a PCS account. This extends portal access beyond existing customers; submitted applications are reviewed by PCS staff (back-office review, tracked in the Sales Portal).

User Stories

US-130 — As a prospective customer, I want to enter my company information so that PCS can identify my business.

US-131 — As a prospective customer, I want to provide my contact and address details so that PCS can reach me and set up billing/shipping.

US-132 — As a prospective customer, I want to describe my business profile (volume, device interests, countries) so that PCS can assess my account.

US-133 — As a prospective customer, I want to upload the required documents so that PCS can verify my business.

US-134 — As a prospective customer, I want to review my application and confirm the terms before submitting so that I can check everything is correct.

US-135 — As a prospective customer, I want to receive a reference number after submitting so that I can follow up on my application.

US-136 — As a prospective customer, I want to be notified of the outcome of my application so that I know whether my account has been approved.

Application Steps

Step	Title	Key Fields / Actions
1	Company Information	Legal business name, trading name, company registration number, VAT/tax ID, industry vertical, website URL
2	Contact Details	Primary contact name, job title, email, phone; billing address; optional shipping address toggle
3	Business Profile	Years in operation, estimated monthly volume, device types of interest, countries of operation
4	Document Upload	Certificate of incorporation, proof of address, photo ID

Step	Title	Key Fields / Actions
5	Review & Submit	Summary, T&Cs confirmation, Submit Application; customer receives a reference number

Use Cases

ID	Use Case	Actor	Outcome
UC-130	Enter company information	Prospect	Company details captured in Step 1
UC-131	Enter contact details	Prospect	Contact and address details captured in Step 2
UC-132	Enter business profile	Prospect	Business profile captured in Step 3
UC-133	Upload documents	Prospect	Required documents uploaded in Step 4
UC-134	Review & submit	Prospect	Application summary reviewed, terms confirmed, and application submitted
UC-135	Receive reference number	Prospect	A unique application reference number is issued on submission
UC-136	Receive application outcome	Prospect	Prospect is notified when the application is approved or declined

4. Meeting Scheduler

Customers can schedule meetings with their assigned PCS Sales Representative.

Prerequisite: Sales representative calendar availability requires calendar integration (e.g. Office 365). This must be in place before delivery.

User Stories

US-140 — As a customer, I want to book a call or meeting with my assigned PCS Sales Representative so that I can discuss my account.

US-141 — As a customer, I want to see available time slots from my sales rep's calendar so that I can choose a time that works for both of us.

US-142 — As a customer, I want to receive a confirmation email and calendar invite so that the meeting is added to my calendar.

US-143 — As a customer, I want to view my upcoming and past meetings so that I can keep track of my engagements with PCS.

US-144 — As a customer, I want to reschedule an upcoming meeting so that I can move it when my availability changes.

US-145 — As a customer, I want to cancel an upcoming meeting so that I can release the slot if I no longer need it.

Use Cases

ID	Use Case	Actor	Outcome
UC-140	Book a meeting	Customer	A meeting is booked with the assigned sales rep at a selected time
UC-141	View availability	Customer	Available slots from the sales rep's calendar are displayed
UC-142	Receive confirmation & invite	Customer	Confirmation email and calendar invite are sent to both parties
UC-143	View meeting history	Customer	Upcoming and past meetings are listed
UC-144	Reschedule meeting	Customer	An upcoming meeting is moved to a new available slot; both parties are notified
UC-145	Cancel meeting	Customer	An upcoming meeting is cancelled and the slot released; both parties are notified

5. General & Advanced (Epics)

The following are captured as higher-level epics. Each will be broken down into full user stories and receive its own sign-off before development, as priorities are confirmed.

ID	Epic	Description
US-150	Live chat with support	Real-time chat between customers and the PCS support team, complementing the ticket system
US-151	Reporting & analytics dashboard	Custom reporting and a data-analytics dashboard over the customer's orders, shipments, and financials
US-152	Multi-currency billing	Invoicing and financial display in multiple currencies
US-153	Native mobile app	Native iOS / Android applications
US-154	Passwordless / passkey login	Passwordless and passkey authentication (Auth0-supported), extending the Stage 1 login
US-155	Advanced notification controls	Finer-grained, per-event notification routing across email, SMS, and in-app channels

6. Dashboard Additions

Addition	Description
Integration health indicator	Status of connected ERP/WMS and recent webhook delivery health (Admin view)
Upcoming meetings panel	Next scheduled meeting(s) with the sales rep
Live chat launcher	Entry point to start a live chat with support (when the Live Chat epic is delivered)

7. User Roles & Permissions

Stage 3 features are added to the access matrix. Role definitions are unchanged (Admin, Buyer, Viewer).

Feature	Admin	Buyer	Viewer
Manage API keys	✓	—	—
Configure webhooks	✓	—	—
Connect / sync ERP/WMS	✓	—	—
Configure custom integrations	✓	—	—
View carrier tracking	✓	✓	✓
Register driver / manage pickup contacts	✓	✓	—
Generate pickup authorization	✓	✓	—
Book / reschedule / cancel meetings	✓	✓	—
View meetings	✓	✓	✓

New Customer Application is completed by prospective customers who do not yet have portal access, so it sits outside the Admin/Buyer/Viewer matrix.

8. Out of Scope for Stage 3

- Any feature not explicitly listed above.
- Epics in Section 5 are not committed to a delivery date; they will be prioritised and broken down separately.
- Sales Portal capabilities (RMA Management Queue, Sales Estimate Approvals, Backoffice Dashboard, Customer Analytics & AI Insights) — tracked in the Sales Portal requirements.
